

Children/Youth (0-17 yrs.) Treatment Settings: Home by RSN.
--

Operational Definition: Percent of child/youth (0-17 yrs) mental health outpatient clients who received services in the home in a Fiscal Year by RSN.

Operational Measure: Child/Youth (0-17 yrs) mental health outpatient clients who received services in the home within the Fiscal Year divided by the total number of outpatient recipients in the Fiscal Year.

Formulas:

Number of Child/Youth (0-17 yrs) mental health outpatient clients who received services in the home in the
Fiscal Year by RSN

Number of child/youth (0-17 yrs) receiving community outpatient services in Fiscal Year by RSN

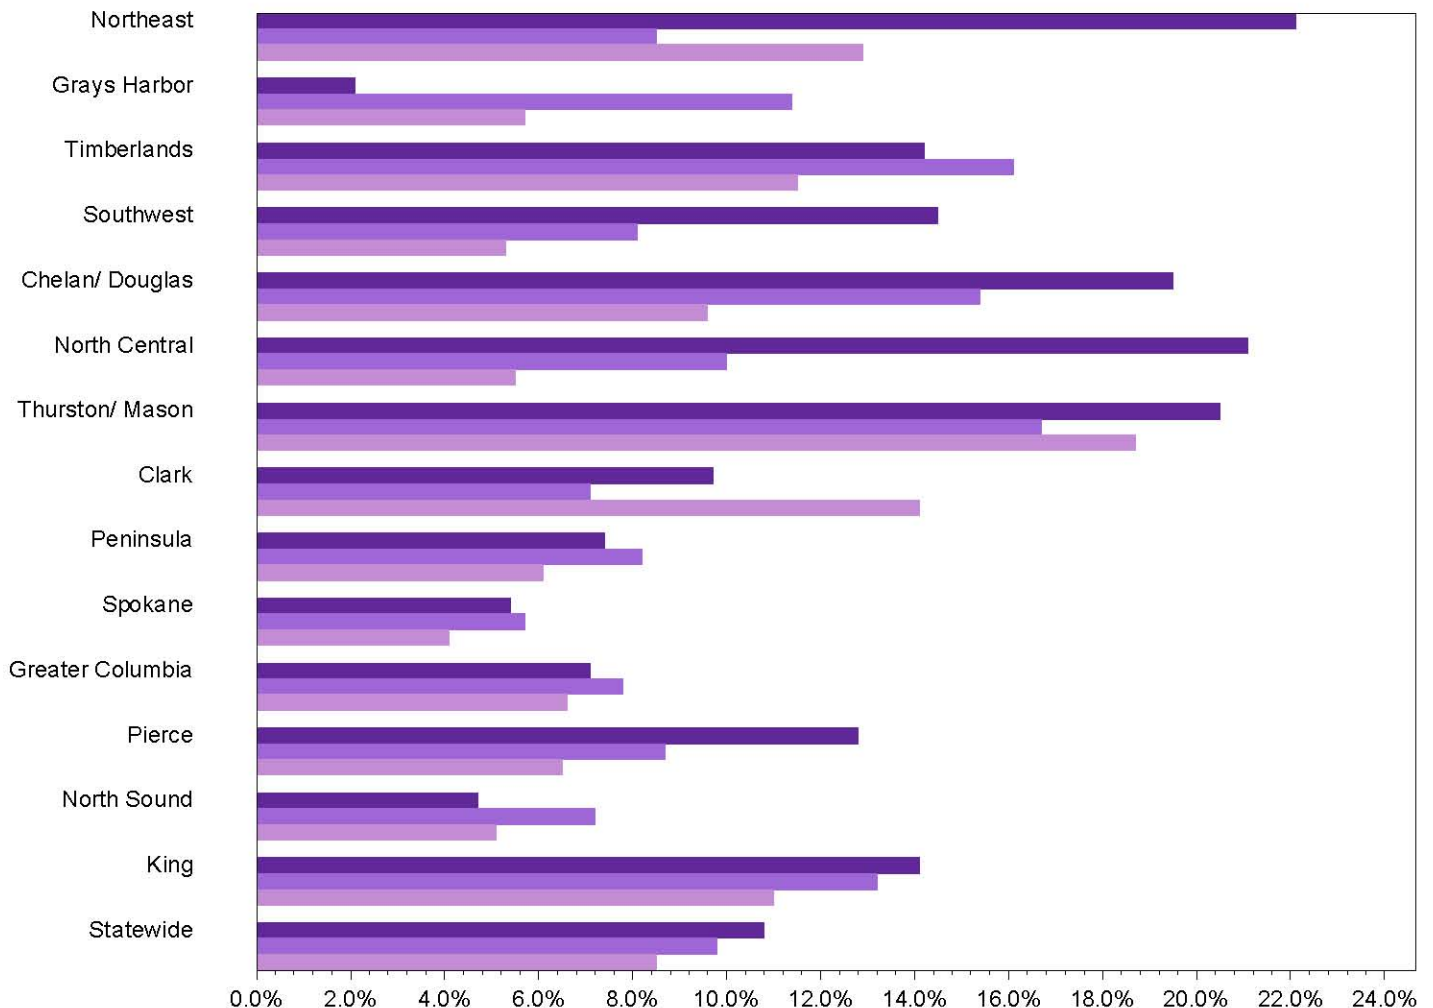

Discussion: This indicator shows the percentage of children/youth who received outpatient services in their home, at school, and in other settings outside of the mental health provider agency. The percentage of children served in home and school has decreased across the 3 years, while the percentage served outside the mental health provider has fluctuated.

Data Notes:

- A child/youth could receive services in more than one of these settings in a year; therefore, the count across categories is duplicated.
- Age is calculated as of January 1st for each Fiscal Year.
- “Healthcare Service Location” in the January 1, 2002 MHD Data Dictionary is used to define service location. Home = 12, School = 19 & 80, Outside Mental Health Provider Agency = 21, 22, 23, 51, 52, 56, 99, 31-34, 61, 50, 71, 72, 54, 55.
- Multiple Healthcare Service Location codes were grouped into Outside Mental Health Provider Agency because the number of people served in each individual location is too small to report on separately.
- RSN counts show the number of unduplicated clients within each RSN (i.e. a person is counted once in each RSN where they receive services).
- The State total is unduplicated across all RSNs (i.e. each person is only counted once in the Statewide total even though they can be counted in more than one RSN).
